

BUYAX | BUYCX | BUYIX

The **Catalyst Buyback Strategy Fund** seeks to offer investors a compelling opportunity to exploit the potential excess returns from share buyback announcements.

FUND OBJECTIVE

To achieve long-term capital appreciation.

INVESTMENT STRATEGY

- The Fund invests primarily in the common stocks of U.S. companies that have announced their intention to repurchase a portion of the company's outstanding shares.
- The Fund may invest in companies of any market capitalization.
- The Fund uses proprietary investment models, which are designed to capture the price reaction to share repurchase announcements.

INVESTMENT PROCESS

- Use quantitative models to identify U.S. companies with the most-favorable share buyback announcements by focusing on factors like the size of the buyback, the length of time since announcement, post-announcement price reaction, volatility, liquidity and trading patterns.
- Construct a risk-managed portfolio by imposing size, liquidity and position weight constraints.
- Sell stocks when more favorable investment opportunities arise.

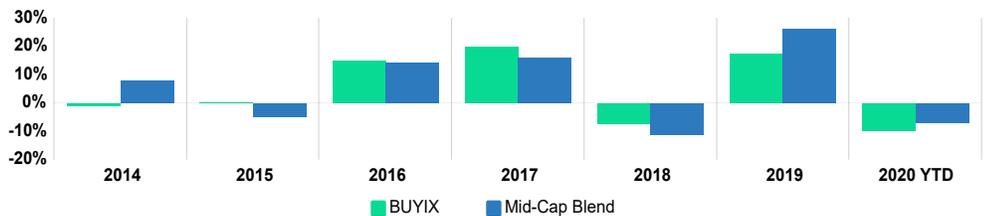

Primary Goals & Key Reasons to Invest

Buyback-Driven: Stock buybacks have exceeded the value of cash dividends during the past 15 years. Research findings indicate that share buyback announcements provide a compelling signal for potential short-term post-announcement excess returns.

Disciplined Strategy: The investment process utilizes quantitative models to rank buyback announcements based on firm, security and buyback-announcement specific factors. The results are then analyzed to ensure the selected stocks meet our investment guidelines.

Low Correlation: Low correlation with most major asset classes historically suggests that the Buyback Strategy can be a satellite growth strategy that complements a long-term core investment plan to help build a diversified portfolio.

Annual Returns (%) Ending September 30, 2020

	2014	2015	2016	2017	2018	2019	2020 YTD

Glossary:

Alpha: A measure of the difference between a fund's actual returns and its expected performance, given its level of risk as measured by beta. **Beta:** A measure of a fund's sensitivity to market movements. **R-squared:** A measure of the relationship between a portfolio and its benchmark. **Correlation:** A statistical measure of how two securities move in relation to each other. **S&P 500 Index:** Considered to be generally representative of the U.S. large capitalization stock market as a whole.

Risk Considerations:

Past performance is not a guarantee of future results.

Investors should carefully consider the investment objectives, risks, charges, and expenses of the Catalyst Funds. This and other important information about the Fund is contained in the prospectus, which can be obtained by calling 866-447-4228 or at www.CatalystMF.com. The prospectus should be read carefully before investing. The Catalyst Funds are distributed by Northern Lights Distributors, LLC, member FINRA/SIPC. Catalyst Capital Advisors, LLC is not affiliated with Northern Lights Distributors, LLC.

Investing in the Fund carries certain risks. The value of the Fund may decrease in response to the activities and financial prospects of an individual security in the Fund's portfolio. The performance of the Fund may be subject to substantial short-term changes. To the extent the Fund invests in the stocks of smaller-sized companies, the Fund may be subject to additional risks, including the risk that earnings and prospects of these companies are more volatile than larger companies. Smaller-sized companies may experience higher failure rates than larger companies and normally have lower trading volume than larger companies. These factors may affect the value of your investment.
