

OIPAX | OIPCX | OIPIX

Rated 5-stars by Morningstar for the period ending 03/31/2019, based on 3 year risk-adjusted returns, out of 555 funds in the Mid-Cap Growth category.

LIPPER FUND AWARDS FROM REFINITIV

BEST ALTERNATIVE EVENT DRIVEN FUND
For highest consistent return value among 49 funds for the three-year period ending 11/30/2018.

FUND OBJECTIVE

To achieve capital appreciation by implementing an alpha-driven investment process focusing on IPOs.

PRIMARY GOALS & KEY REASONS TO INVEST

IPO Exposure: The Fund offers exposure to IPOs through two distinct strategies, including exclusive mutual fund access to the IPOX U.S. 100 Index through the Core Long Component.

Disciplined Strategy: The investment process utilizes quantitative models to rank and select IPOs.

INVESTMENT STRATEGY

The fund invests in common stocks of companies listed on the IPOX U.S. 100 Index and newly listed public offerings of U.S. companies. The stocks may be purchased at the time of the offering or in post-IPO trading ("IPOs"). The fund's portfolio has two components: the **Core Long Component** and the **Dynamic Component**, each utilizing a distinct investment strategy.

- **Core Long Component:** invests assets so as to replicate the IPOX U.S. 100 Index, which includes the largest IPOs and companies with a substantial increase in value since their floatation.
- **Dynamic Component:** invests assets in approximately 30-70 IPOs that are not included in the Core Long Component that are valued attractively relative to their price to sales multiple. Companies eligible for investment enter on the date of their initial public offering and exit one month thereafter.

The fund may continue to add to any existing position after the one month period has ended.

The Catalyst IPOx Allocation Fund implements a distinct strategy that seeks to provide investors with the potential excess returns from investing in IPOs.

IPOX U.S. 100 Total Return Index Performance: Ending March 31, 2019 (Not Fund Performance)

The fund's Core Long Component seeks to replicate the IPOX U.S. 100 TR Index (published 8/6/2004), which measures the performance of the top 100 companies ranked quarterly by market capitalization in the IPOX U.S. Composite Index. Investors cannot invest in an index and unmanaged index returns do not reflect any fees, expenses or sales charges. The Fund is new and does not have performance history.

Calendar Year Returns OIPIX VS. SP500TR

Performance (%): Ending March 31, 2019

Annualized if greater than a year

Share Class/Benchmark	3 Months	YTD	1 Year	3 Year	Since Inception*

Performance & Risk Statistics

(December 31, 2015 – March 31, 2019)

	OIPAX
Alpha (vs. S&P 500)	0.20%
Beta (vs. S&P 500)	1.05
R-squared (vs. S&P 500)	0.67

GLOSSARY & RISK CONSIDERATIONS:

Standard Deviation (Volatility): A measure of the dispersion of monthly returns from its mean return, also known as historical volatility. **Alpha:** A measure of the difference between a fund's actual returns and its expected performance, given its level of risk as measured by beta. **Beta:** A measure of a fund's sensitivity to market movements. **R-squared:** A measure of the relationship between a portfolio and its benchmark. **S&P 500 Total Return Index:** is considered to be generally representative of the U.S. large capitalization stock market as a whole.

Past performance is not a guarantee of future results.

Investing in the Fund carries certain risks. The value of the Fund may decrease in response to the activities and financial prospects of an individual security in the Fund's portfolio. The Fund is non-diversified and may invest a greater percentage of its assets in a particular issue and may own fewer securities than other mutual funds. The performance of the Fund may be subject to substantial short term changes. There are risks associated with investing in IPOs, including extreme volatility, speculative trading and limited liquidity. To the extent the Fund invests in the stocks of smaller-sized companies, the Fund may be subject to additional risks, including the risk that earnings and prospects of these companies are more volatile than larger companies. Smaller-sized companies may experience higher failure rates than larger companies and normally have lower trading volume than larger companies. These factors may affect the value of your investment.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics.

The Lipper Fund Awards are based on the Lipper Leader for Consistent Return rating, which is a risk-adjusted performance measure calculated over 36, 60 and 120 months. The fund with the highest Lipper Leader for Consistent Return (Effective Return) value in each eligible classification wins the Lipper Fund Award. For more information, see lipperfundawards.com. Although Lipper makes reasonable efforts to ensure the accuracy and reliability of the data contained herein, the accuracy is not guaranteed by Lipper. The Lipper award is for the I share class only; other classes may have different performance characteristics due to different expense ratios.
