

MLXAX | MLXCX | MLXIX

MLXIX rated 5-stars by Morningstar for the period ending 3/31/2019, based on 3 year risk-adjusted returns, out of 99 funds in the Energy Limited Partnership category.

## FUND OBJECTIVE

To achieve current income and capital appreciation by investing in the equity securities of energy infrastructure corporations and MLPs, seeking to realize long-term growth in dividends and distributions.

## INVESTMENT STRATEGY

The Fund focuses on entities that derive a majority of their revenue from midstream energy infrastructure related businesses which generate more stable cash flows than businesses with more commodity exposure. Midstream activities include treatment, gathering, processing, storage and transportation of natural gas, natural gas liquids and crude oil.

The Fund seeks to hold a portfolio of 20-30 securities meeting the investment criteria. The management team favors issuers with a demonstrated history of stable and growing distributions and well-regarded management teams.

More than 75% of the portfolio is invested in corporations that meet the investment criteria noted above. MLPs are limited to less than 25% so as to maintain the fund's RIC-compliance status and avoid any Federal corporate tax liability. When investing in MLPs, the Fund seeks to align with management by focusing on GPs and consolidated MLPs and avoiding MLPs with IDR burdens.

## Monthly Distributions

Payable Date	MLXIX	NAV
3/28/2019	\$0.0538	\$4.92
2/27/2019	\$0.0537	\$4.81
1/30/2019	\$0.0539	\$4.85

The Catalyst MLP & Infrastructure Fund invests in equity securities of master limited partnerships ("MLPs") and energy infrastructure corporations, seeking to realize long-term growth in dividends and distributions.

## Primary Goals & Key Reasons To Invest

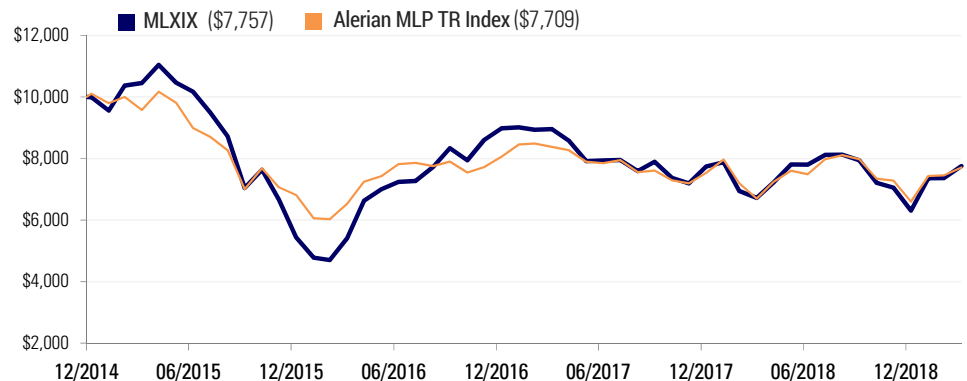

**Advantages Over Traditional MLPs:** By focusing on energy infrastructure corporations as well as MLPs, the Fund offers potential advantages over dedicated MLPs funds, including preferential economics, stronger corporate governance, and a larger investment universe.

**Attractive Yield Potential:** The Fund focuses on reliable distributions with growth prospects linked to midstream energy companies, such as pipeline and storage businesses, which own and develop long-lived assets with recurring distributions and attractive growth prospects.

**Strong Track Record:** In 2005, the Portfolio Manager seeded Alerian Capital Management (who developed the primary index for the sector) and has been investing in MLPs & energy infrastructure ever since. The management team has managed a similar strategy in SMA format (see Prospectus for performance), which has consistently met its objective of current income and capital appreciation.

**Preferential Tax Treatment:** The Fund keeps MLP investments to less than 25% to avoid the corporate tax incurred by mutual funds and ETFs that invest primarily in MLPs. Fund investors will receive a 1099.

## Growth of \$10,000: Ending March 31, 2019

## Performance (%): Ending March 31, 2019

## GLOSSARY & RISK CONSIDERATIONS:

**Alerian MLP TR Index** is the leading gauge of large-cap and mid-cap energy Master Limited Partnerships (MLPs).

**Alpha:** A measure of the difference between a fund's actual returns and its expected performance, given its level of risk as measured by beta. **Beta:** A measure of a fund's sensitivity to market movements. **R-squared:** A measure of the relationship between a portfolio and its benchmark. **Master Limited Partnerships (MLPs):** Publicly traded partnerships that predominately operate, or directly or indirectly own, energy related assets.

**Past performance is not a guarantee of future results.**

Investors should carefully consider the investment objectives, risks, charges and expenses of the Catalyst Funds. This and other important information about the Fund is contained in the prospectus, which can be obtained by calling 866-447-4228 or at [www.CatalystMF.com](http://www.CatalystMF.com). The prospectus should be read carefully before investing. The Catalyst Funds are distributed by Northern Lights Distributors, LLC, member FINRA/SIPC. Catalyst Capital Advisors, LLC is not affiliated with Northern Lights Distributors, LLC.

*Investing in the Fund carries certain risks. The value of the Fund may decrease in response to the activities and financial prospects of an individual security in the Fund's portfolio. The Fund focuses its investments in the energy infrastructure sector, which may cause the performance of the Fund to be tied closely to developments in the energy sector. The Fund investments may include foreign securities. Foreign companies are not subject to the same regulatory requirements as domestic securities thereby resulting in less publicly available information. Investments in lesser-known, small and medium capitalization companies may be more vulnerable than larger, more established organizations. Investments in MLPs and MLP-related securities involve risks different from those of investing in common stocks. Potential risks include conflicts of interest between an MLP and the MLP's general partner, cash flow risks, and dilution risks. MLPs and MLP-related securities are generally considered interest-rate sensitive investments. Depending on the state of interest rates in general, the use of MLPs could enhance or harm the overall performance of the Fund. These factors may affect the value of your investment.*

The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics.
