#### How did the Fund perform during the reporting period?

The Catalyst Nasdaq-100 Hedged Equity Fund had a fantastic year in 2023, ranking within the top 3% of the options trading category. While 2024 has presented a different market environment, the Fund is ranked in the second quartile of funds in the Morningstar options trading category year-to-date. This performance is partly due to the Fund's continued investment in the well-performing Nasdaq-100 Index.

We're particularly pleased with the risk reduction provided by the Fund's volatility hedge. Implemented into the Fund by Equity Armor Investments in October 2020, this strategy utilizes futures contracts on the CBOE Volatility Index (VIX) to potentially lessen market downside. This core component of the Fund's strategy aims to deliver positive returns with lower volatility.

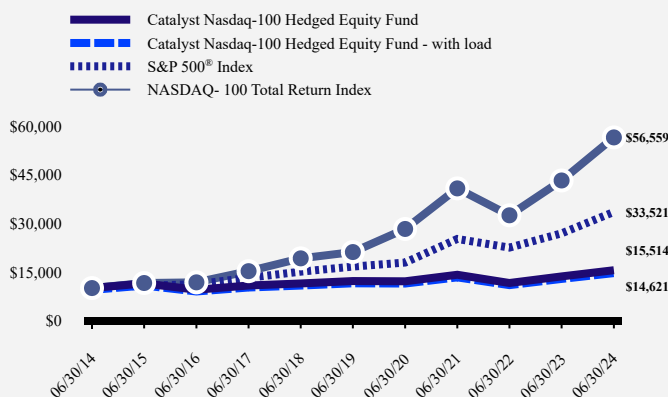

Our mission remains focused on providing equity exposure with managed risk. We believe in the long-term potential of the markets while acknowledging the importance of mitigating downside risk. The Fund achieves this through its unique combination of equity investment and dynamic volatility hedging.

The Fund employs a dynamic hedge and active rebalancing strategy. This approach allows us to continuously adjust the Fund's positioning based on market conditions, aiming to capture opportunities while protecting your investment.

We sincerely appreciate your continued trust and investment in the Fund. We remain committed to delivering value by offering a balanced approach to equity exposure with a volatility hedge.
