#### What were the Fund's costs for the last year?

(based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class A	\$148	1.48%

#### How did the Fund perform during the reporting period?

Performance of the Fund was primarily driven by the stoppage of increasing interest rates and a general move into more risk-based assets. The Fund outperformed the Ice BofA Cash Pay High Yield Index during the reporting period. The Fund's returns were higher than our return expectations for the period. We do see a high likelihood of an economic slowdown and uncertainty and expect the overall markets to be volatile moving forward. The high yield class in general should be one of the better performing asset classes in credit on a go forward basis. We are looking at current yields of 6.4% and hope to add a couple more percent in returns above that.

#### How has the Fund performed over the last ten years?

#### Average Annual Total Returns
