

DCXAX | DCXCX | DCXIX

FUND OBJECTIVE

The Fund's investment objective is long-term capital appreciation.

INVESTMENT STRATEGY

The Fund seeks to achieve its investment objective by investing in a portfolio comprising exposure to futures and options on futures (the "Futures Component") and common stocks relating primarily to commodities and natural resources (the "Equity Component").

FUTURES COMPONENT

The Futures Component allocates among metals, energy, emission rights, agricultural and other commodity futures.

- The Fund invests approximately 60% of assets in the Futures Component. Holdings may include long and/or short positions, directly or indirectly, or swaps in futures contracts or indices, options on futures contracts, and cash and cash equivalents for margin collateral
- Active, proprietary trading systems generate signals in a particular market based primarily on the analysis of technical market information (including price, liquidity and transaction costs), determining when to overweight or underweight each instrument, and to what degree.

EQUITY COMPONENT

- The Equity Component allocates among common stocks, exchange-traded funds ("ETFs") that primarily invest in common stocks, and swaps on these instruments. These are selected based on characteristics that include diversification value, liquidity and other criteria.
- The Equity Component is intended to provide long-term, strategic exposure to a number of U.S. and international equity markets and securities in sectors related to: commodities, commodities brokerage, agriculture, farmland, timber, utilities, infrastructure, natural resources, and renewable resources. Securities may be of any market capitalization, sector and geographic location (including emerging markets).
- The Fund invests approximately 60% of assets in the Equity Component.
- The Equity Component investments are made on a long-only basis.

The **Catalyst/Millburn Dynamic Commodity Strategy Fund** seeks to provide long-term strategic exposure to global commodity markets and U.S. and international equity securities in sectors related to commodities, making use of a tactical element to assume a more opportunistic or defensive posture depending on market conditions.

Primary Goals & Reasons to Invest

The Fund seeks to invest systematically in a portfolio of primarily commodity, commodity-related and resource-related instruments, combining an active futures strategy with a more passive strategy in equity securities. Trading systems utilized for the futures markets generate signals based on the analysis of momentum and other inputs to determine whether to take relatively higher or lower exposures, providing opportunities to take advantage of extended periods of price appreciation, or, conversely, preserve capital, as market conditions dictate.

The Fund provides investors with the potential to benefit from:

- Extended, or periodic, cycles of upward price trends in traditional and "next generation" commodities and natural resource markets
- Periods of rising inflation
- Returns in simulation that have demonstrated low correlation to traditional equity or fixed income investments
- The experience of a leading quantitative manager that has been trading commodity markets for more than 50 years

Growth of \$10,000 Since Strategy Change: Ending December 31, 2024

Since Strategy Change on June 1, 2021

Performance (%): Ending December 31, 2024

Annualized if greater than a year

¹Prior to 06/01/2021, the Catalyst/Millburn Dynamic Commodity Strategy Fund was named the Catalyst Hedged Commodity Strategy Fund, which implemented a different investment strategy and had a different management team.

Investing in the Futures markets through futures-linked ETFs OR ETNs will subject the Fund to potentially greater volatility than traditional securities. ¹Traded on regulated exchanges or the interbank FX market. Markets traded are as of June 1, 2021 and are subject to change.

Glossary:

Bloomberg Commodity Index TR ("BCOMM TR") is composed of futures contracts and reflects the returns of fully collateralized investments in BCOM, which reflects commodity futures price movements. **S&P 500 Index** is a market capitalization-weighted index that is used to represent the U.S. large-cap stock market

Risk Considerations:

You cannot invest directly in an index and unmanaged index returns do not reflect any fees, expenses or sales charges.

Past performance is not a guarantee of future results.

Investors should carefully consider the investment objectives, risks, charges and expenses of the Catalyst Funds. This and other important information about the Fund is contained in the prospectus, which can be obtained by calling 866-447-4228 or at www.CatalystMF.com. The prospectus should be read carefully before investing. The Catalyst Funds are distributed by Northern Lights Distributors, LLC, member FINRA/SIPC. Catalyst Capital Advisors, LLC is not affiliated with Northern Lights Distributors, LLC.

Investing in the Fund carries certain risks. The Fund will invest a percentage of its assets in derivatives, such as futures and options contracts. The use of such derivatives and the resulting high portfolio turnover may expose the Fund to additional risks that it would not be subject to if it invested directly in the securities and commodities underlying those derivatives. The Fund may experience losses that exceed those experienced by funds that do not use futures contracts, options and hedging strategies. Investing in commodities markets may subject the Fund to greater volatility than investments in traditional securities. Changes in interest rates and the liquidity of certain investments could affect the Fund's overall performance. Other risks include U.S. Government securities risks and investments in fixed income securities. Typically, a rise in interest rates causes a decline in the value of fixed income securities or derivatives owned by the Fund. Furthermore, the use of leveraging can magnify the potential for gain or loss and amplify the effects of market volatility on the Fund's share price. The Fund is subject to regulatory change and tax risks; changes to current rules could increase costs associated with an investment in the Fund. These factors may affect the value of your investment.
