

INSAX | INSCX | INSIX

FUND OBJECTIVE

The Fund's objective is long-term capital appreciation.

INVESTMENT STRATEGIES

The Fund invests in a portfolio that combines two components: a common stock component and an overlay component that provides exposure to quantitative investment strategies.

The Common Stock Component:

- » Only invests in companies where corporate insiders (CEO, CFO, directors, etc.) are purchasing their own company stock on the open market. The underlying thesis is that corporate insiders understand their own firm better than any outsider possibly could.
- » While this component implements an alpha-driven investment approach by only investing in companies that insiders are purchasing, it focuses on the largest, most well-known U.S. companies.
- » Uses a proprietary, quantitative model to rank stocks based on insider activity. A qualitative review is performed on all stocks that meet the quantitative criteria.

The Overlay Component:

- » Designed to provide the Fund with exposure to various asset classes and strategies that have the potential to produce attractive total return over the long-term with low to moderate correlation to equities & bonds.
- » This component pursues an absolute return strategy that attempts to capture various sources of risk premia in the capital markets.
- » Provides exposure in the pursuit of risk premia to a blend of carry, momentum, value, and volatility across equity, commodity, foreign exchange, and fixed income markets.
- » The component's allocations across these risk premia strategies are made at the discretion of the portfolio manager with the intent to complement the Common Stock Component.

INVESTMENT STRATEGY

The Fund uses public information that is filed with the Securities and Exchange Commission ("SEC") on corporate insider and large shareholder buying and selling activity for its investment decisions. Our research and quantitative back-testing of insider trading data over long periods of time has resulted in the development of a proprietary method of analyzing activity that we believe can provide long-term capital appreciation. The underlying thesis is that corporate insiders know more about the prospects of the company than anybody else. The Fund emphasizes U.S. companies with market capitalizations of at least \$10 billion.

The **Catalyst Insider Buying Fund** seeks to offer investors an opportunity to invest in large capitalization U.S. companies that are experiencing significant insider buying.

Class A: INSAX | Class C: INSCX | Class I: INSIX

Catalyst Funds
Intelligent Alternatives

Investment Process

Proprietary Quantitative Screen

- Track and rank corporate insider activity based on Form 4 filings
- Focus on: open market purchases, insider identity (position in company), transaction size, number of insiders buying, historical track record, etc.

Qualitative Review

- Analyze results of quantitative screen for potential inclusion in portfolio
- Take into consideration: potential motivations, company and/or industry trends, conflicting buy/sell signals, etc.

Active Monitoring

- Monitor portfolio holdings for changes in insider activity
- Sell positions at any time if significant insider selling occurs
- If a position has no continued buying, seek to replace after 1 year with new holding
- Seek to stay focused on the best opportunities

Portfolio Construction

- Seek to hold 30 to 50 companies meeting quantitative screen & qualitative review criteria
- Focus on companies with market capitalization over \$10 billion
- Consider both value and growth companies
- Limit industry concentration to 25%

Glossary:

Alpha: A measure of the difference between a fund's actual returns and its expected performance, given its level of risk as measured by beta. **Beta:** A measure of a fund's sensitivity to market movements. **Commodity:** a basic good used in commerce. Investors and traders can buy and sell commodities directly in the spot (cash) market or via derivatives such as futures and options. **R-squared:** A measure of the relationship between a portfolio and its benchmark. **Risk premia:** the extra return an investor receives for taking on riskier investments. **Sharpe Ratio:** A risk-adjusted measure of a fund's performance that indicates a fund's return per unit of risk, defining risk as volatility (standard deviation). **Standard Deviation (Volatility):** A risk metric that measures the volatility of a fund's excess returns over its benchmark; measures volatility of both positive and negative excess returns. **S&P 500 Total Return Index** is used to represent the U.S. large-cap stock market.

Risk Considerations:

Past performance is not a guarantee of future results.

Investors should carefully consider the investment objectives, risks, charges and expenses of the Catalyst Funds. This and other important information about the Fund is contained in the prospectus, which can be obtained by calling 866-447-4228 or at www.CatalystMF.com. The prospectus should be read carefully before investing. The Catalyst Funds are distributed by Northern Lights Distributors, LLC, member FINRA/SIPC. Catalyst Capital Advisors, LLC is not affiliated with Northern Lights Distributors, LLC.

The adviser's judgments about the growth, value or potential appreciation of an investment may prove to be incorrect or fail to have the intended results, which could adversely impact the Fund's performance and cause it to underperform relative to other funds with similar investment goals or relative to its benchmark, or not to achieve its investment goal.

Investing in the Fund carries certain risks. The value of the Fund may decrease in response to the activities and financial prospects of an individual security in the Fund's portfolio. The performance of the Fund may be subject to substantial short term changes. To the extent the Fund invests in the stocks of smaller-sized companies, the Fund may be subject to additional risks, including the risk that earnings and prospects of these companies are more volatile than larger companies. Smaller-sized companies may experience higher failure rates than larger companies and normally have lower trading volume than larger companies. These factors may affect the value of your investment.
