

SHIEX | SHINX | SHIIX

FUND OBJECTIVE

The Fund seeks long-term capital appreciation.

WHAT'S THE HEDGE?

The Fund seeks to limit losses to 12.5% when the S&P 500 Index declines in value.

INVESTMENT STRATEGY

- The Fund seeks to achieve its investment objective by investing in a series of put and call options on exchange traded funds ("ETFs") that track the S&P 500 Index and in fixed income securities.
- Each series consists of (1) a downside put spread which serves to limit downside risk, providing a tail hedge, and (2) an upside call spread which assists in financing the defense and results in a cap on the upside.
- The investment strategy is implemented through a rolling ladder portfolio.
- The portfolio is then regularly optimized based on market activity to maintain a consistent tail-risk hedge and upside participation.

There is no guarantee any investment strategy will achieve its objectives, generate profits or avoid losses. Option strategies involve significant risk and may not be suitable for all investors.

The **S&P 500 Index** is an index of 500 stocks seen as a leading indicator of U.S. equities and a reflection of the performance of the large cap universe, made up of companies selected by economists. Unmanaged index returns do not reflect fees, expenses or sales charges.

Static Floor: This represents the approximate level of downside risk that investors could expect without optimization. The downside risk is relative to the value at which the investment strategy was implemented.

Optimization: This represents the process of making adjustments to the floor with the goal of keeping downside risk relative to market conditions. For example, in a rising market, the floor would be optimized upwards so that the downside risk is approximately 12.5% of the market value at the time of optimization rather than 12.5% at the time of initially implementing the strategy.

The Catalyst Buffered Shield Fund seeks to offer a better approach to defined outcome investing with a distinct "stepping up" hedge approach.

Examples of Fund Performance in Different Environments

Q1 2020 | "Covid-19" Drop

Defined Shield: Optimized 10% - 12.5% Floor

01/2021 - 12/31/2021 Performance: Always Participating; Regularly Optimizing

The purpose of this chart is to provide an upside participation example. The most recent performance is on Page 2.

The Original Floor and Floor Step Up are representative of only the option portfolio and are target amounts. This does not reflect the impact of any performance from the bond allocations.

Short-term investment grade securities are held in collateral which may negatively affect performance in increasing rate environments.

CATALYST BUFFERED SHIELD FUND

Q3 2022 Fact Sheet

*Inception: 4/14/2015

There is no assurance that the Fund will achieve its investment objective.

You cannot invest directly in an index and unmanaged index returns do not reflect any fees, expenses or sales charges.

The Fund's maximum sales charge for Class "A" shares is 5.75%. Investments in mutual funds involve risks. Performance is historic and does not guarantee future results. Investment return and principal value will fluctuate with changing market conditions so that when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month end performance information or the Fund's prospectus please call the Fund, toll free at 1-866-447-4228. You can also obtain a prospectus at www.CatalystMF.com.

Important Risk Considerations:

Past performance is not a guarantee of future results.

Investors should carefully consider the investment objectives, risks, charges and expenses of the Catalyst Funds. This and other important information about the Fund is contained in the prospectus, which can be obtained by calling 866-447-4228 or at www.CatalystMF.com. The prospectus should be read carefully before investing. The Catalyst Funds are distributed by Northern Lights Distributors, LLC, member FINRA/SIPC. Catalyst Capital Advisors, LLC is not affiliated with Northern Lights Distributors, LLC.

Mutual Funds involve risks including the possible loss of principal. The Fund may focus its investments in securities to a particular sector or type of securities to the extent the Index is similarly concentrated. A counterparty may become bankrupt or otherwise fail to perform its obligations due to financial difficulties, jeopardizing the value of the Fund's investment. Derivative instruments, including options may entail investment exposures that are greater than their cost would suggest. A small investment in a derivative could risk a large potential impact on the performance of the Fund. As the buyer of a put option, the Fund assumes the risk of a rise in the market price of the underlying security above the exercise price of the option which will cause a loss of the premium paid for the option. As a seller (writer) of a put option, the Fund will lose money if the value of the security falls below the strike price. Using leverage can magnify the Fund's potential for gain or loss and; therefore, amplify the effects of market volatility on the Fund's share price. Fixed income securities will fluctuate with changes in interest rates. Common and preferred stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. Other investment companies including ETFs, in which the Fund invests are subject to investment advisory and other expenses, which will be indirectly paid by the Fund. Increased portfolio turnover causes the Fund to incur higher brokerage costs, capital gains and taxable distributions. The Fund is non-diversified and may engage in a representative sampling approach or invest a greater percentage of its assets in a particular issue. The Fund is not actively managed and the Advisor will not sell shares of an equity security due to current or projected underperformance of a security, industry or sector, unless that security is removed from the Index or the selling of shares of that security is otherwise required upon a rebalancing of the Index as addressed in the Index methodology. Tracking error may occur because of imperfect correlation between the Fund's holdings of portfolio securities and those in the Index, pricing differences, the Fund's holding of cash, differences on timing of the accrual of dividends, changes to the Index or the need to meet various regulatory requirements. The Fund may invest in U.S. government or agency obligations which may or may not be backed by the full faith and credit of the U.S. government.
