

TRXAX | TRXCX | TRXIX

FUND OBJECTIVE

The fund seeks total return, which consists of current income and capital appreciation.

PRIMARY GOALS & REASONS TO INVEST

Global Unconstrained: The Fund is not constrained by geography, credit quality or market capitalization. We can go anywhere in an attempt to discover value and generate alpha.

Disciplined Value: We use a strict value discipline with a focus on margin of safety. The equity portfolio is built through a bottom-up approach seeking securities where there is a catalyst to unlock the intrinsic value of the company.

Benchmark Agnostic: The Fund has the ability to increase or decrease fixed income and equity exposure based on market conditions. The Fund typically limits equity exposure to a minimum of 30%, or a maximum of 70%.

INVESTMENT PROCESS

The portfolio is built through a bottom up investment process by selecting temporarily out-of-favor foreign and domestic securities that show an attractive valuation compared to the company's net assets and earnings power. The portfolio managers strive to invest only in securities where there is a catalyst to unlock the intrinsic value of the company.

- Search for securities that are temporarily out of favor with investors.
- Evaluate each company for intrinsic value, a catalyst to unlock value, a margin of safety and global thematic trends. Purchase what the portfolio managers believe to be the strongest ideas.
- Manage volatility by writing covered calls on selected stocks.
- Close positions when cash or other securities offer a better risk/return trade-off.

The **Catalyst/MAP Global Balanced Fund** seeks to offer an alpha-driven, value-oriented approach to total return through equity and fixed income investing unconstrained by geography or market capitalization.

Investors should carefully consider the investment objectives, risks, charges and expenses of the Catalyst Funds. This and other important information about the Fund is contained in the prospectus, which can be obtained by calling 866-447-4228 or at www.CatalystMF.com. The prospectus should be read carefully before investing. The Catalyst Funds are distributed by Northern Lights Distributors, LLC, member FINRA/SIPC. Catalyst Capital Advisors, LLC is not affiliated with Northern Lights Distributors, LLC.

Glossary:

Alpha: A measure of the difference between a fund's actual returns and its expected performance, given its level of risk as measured by beta. **Average Duration:** provides a measure of a fund's interest-rate sensitivity -- the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. **Beta:** A measure of a fund's sensitivity to market movements. **Covered Call:** An option strategy whereby an investor holds a long position in an asset and writes (sells) call options on that asset in an attempt to generate increased income. **MSCI All Country World Stock Index** is used to represent the equity market performance of developed and emerging markets. **R-squared:** A measure of the relationship between a portfolio and its benchmark. **Sharpe Ratio:** A risk-adjusted measure of a fund's performance that indicates a fund's return per unit of risk, defining risk as volatility (standard deviation). **Standard Deviation (Volatility):** A risk metric that measures the volatility of a fund's excess returns over its benchmark; measures volatility of both positive and negative excess returns.

Past performance is not a guarantee of future results.

Risk Considerations:

Investing in the Fund carries certain risks. The value of the Fund may decrease in response to the activities and financial prospects of an individual security in the Fund's portfolio. The Fund may be subject to substantial short-term changes. The Fund invests in the securities of foreign companies which are generally not subject to the same regulatory requirements and have different accounting, auditing and financial reporting standards from those applicable to U.S. companies. The Fund invests in lower-quality, non-investment grade bonds rated Baa or lower by Moody's or BBB or lower by S&P (also known as "junk" bonds). Lower-quality debt securities involve greater risk of default or price changes due to changes in the credit quality of the issuer. A credit rating is the rating firms opinion on the general creditworthiness of an obligor, or the creditworthiness of an obligor with respect to a particular debt security or other financial obligation. These factors may affect the value of your investment.
