# About Catalyst Funds

---

## *Intelligent Alternatives*

We strive to provide innovative strategies to support financial advisors and their clients in meeting the investment challenges of an ever-changing global market environment.

From our founding in 2006, Catalyst Funds set out to be decidedly different. We understood that the market did not need another traditional family of mutual funds. At Catalyst, we endeavor to offer unique investment products to meet the needs of discerning financial advisors and their clients. We offer a broad range of distinctive funds that offer specialized strategies seeking to produce income- and equity-oriented returns while limiting risk and volatility. We offer these exclusive strategies through a team of in-house portfolio managers and boutique institutional investment management partners.

E-mail: [info@CatalystMF.com](mailto:info@CatalystMF.com)

Alternative investments may not be suitable for all investors and an investment in alternative funds is suitable only for investors who can bear the risks associated with the illiquidity of the fund's shares and should be viewed as a long-term investment.

---

# Catalyst/Millburn Hedge Strategy Fund Overview

The **Catalyst/Millburn Hedge Strategy Fund** utilizes complementary active and passive investment strategies, with the goal of outperforming typical long-only equity investments, including reducing drawdowns during protracted periods of stress. The Fund seeks to achieve long-term capital appreciation.

## The MBXAX Strategy:

The Fund's portfolio is comprised of an active long/short futures & currency component and a strategic equity exposure component.

The Fund trades a diverse portfolio of global equity, currency, and interest rate instruments, as well as futures contracts on commodities in the energy, metal and agricultural sectors.

The Fund implements a 100% systematic strategy with the potential to invest in over 125 markets.

*The Fund may experience losses that exceed those experienced by funds that do not use futures contracts, options and hedging strategies. Investing in commodities markets may subject the Fund to greater volatility than investments in traditional securities. The use of leveraging can magnify the potential for gain or loss and amplify the effects of market volatility on the Fund's share price.*

# Systematic Multi-strategy Approach

---

The Fund implements a 100% systematic strategy with the potential to invest in over 125 markets. The Fund's portfolio is comprised of an active long/short futures & FX component and a strategic equity exposure component.

## **Active Long/Short Futures & FX Component:**

This component yields a portfolio of global liquid instruments and strategies that historically have performed in periods of stress for equities. The active long/short futures and forward positions in currency, fixed income, stock index and commodity instruments are determined by statistical-learning-based "quantitative multi-factor" strategies combined with complementary trend-following, which respond to different market conditions.

## **Strategic Equity Exposure Component:**

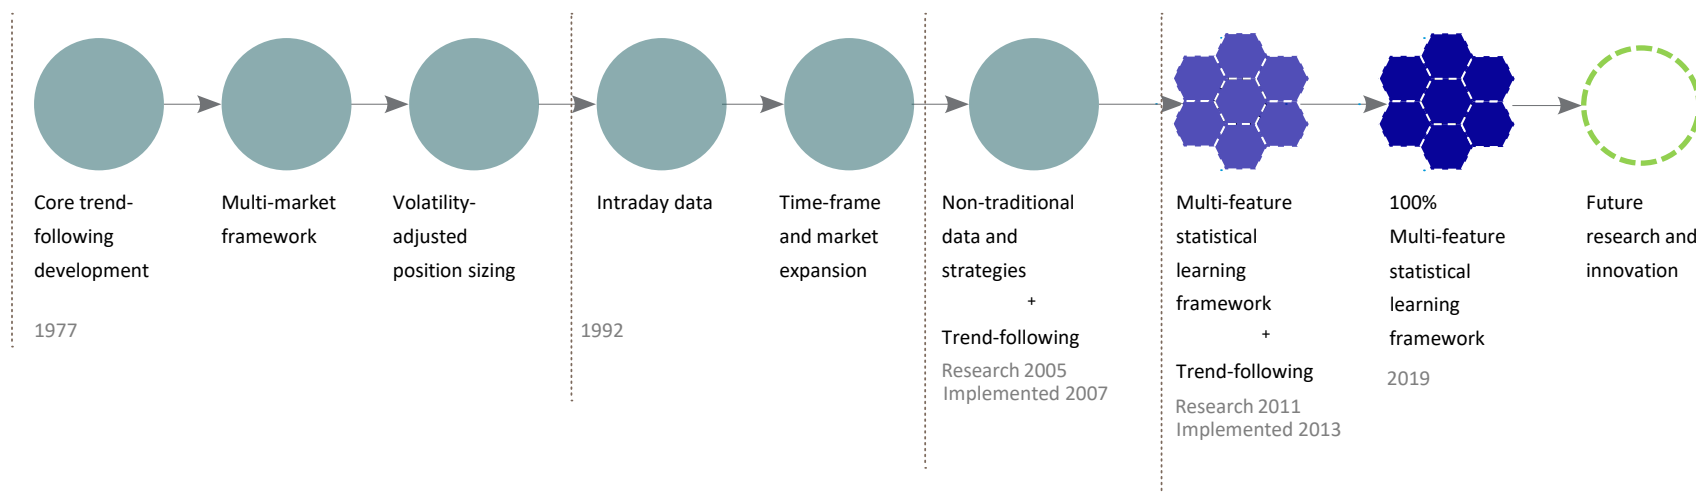

This component yields a relatively passive portfolio of global and U.S. exchange traded funds ("ETFs"). The equity positions generally consist of relatively passive buy and-hold strategies with the goal of maximizing diversification as determined primarily by correlation and risk analysis.

*Even small investments in futures may subject the Fund to greater volatility than investments in traditional securities. Currency risks may include market risk, credit risk, and country risk. The Fund is non-diversified and as a result, changes in the value of a single security may have significant effect on the Fund's value.*

---

# Continuous Evolution of the Research Process

Millburn's research is the product of continuous evolution, including through many bull and bear markets. Millburn approaches innovation through the lens of experience, seeking to extract as much value as possible from data while carefully considering risk.

*There is no guarantee that any investment strategy will achieve its objectives, generate profits or avoid losses. Please see Important Risk Information on page 18.*

# Composite Framework: Multi-Factor

Millburn's latest research innovations in return forecasting are based on the idea that "context matters," and that useful information can be extracted via a multi-factor, statistical learning lens.

- Integrated models, each considering multiple data inputs.
- A "signal" (should a long or short position be taken, and what size?) results from data-driven, contextual weighting that changes dependent on environment.
- Model rebuild process is self-adapting - changes occur as market structure evolves.
- New strategies based on new data; quick to test.

*Past performance does not guarantee future results and there is no assurance that the Fund will achieve its investment objective.*

# Investment Strategy

Catalyst/Millburn was formed with the goal of providing long-term capital appreciation.

- Active, tactical, long/short futures & foreign exchange (“FX”) “absolute return” strategy.
- Portfolio of global liquid instruments and strategies.
- Can be either long or short any futures or FX market traded in the portfolio.
- Historically negatively correlated during stress periods for equities; a potential “shock-absorber” for the portfolio.

- Relatively passive portfolio of long global and U.S. ETFs.
- Provides access to benefits of being “long the market” over the long term.

*The successful use of futures and FX contracts draws upon the Adviser's skill and experience with the respect to such instruments and are subject to special risk considerations. The use of such derivatives and the resulting high portfolio turn-over may expose the Fund to additional risks that it would not be subject to if it invested directly in the securities and commodities underlying those derivatives.*

# Seeking to Manage Drawdowns with Managed Futures

Managed Futures approaches have performed well during many shocks to global equity markets, including during the worst drawdowns and quarters of the S&P 500 Index since 1987.

## Worst 5 Drawdowns for the S&P 500 Index Vs. Managed Futures Index

January 1987 - March 2025

The chart above shows the performance of managed futures, represented by the Barclay BTOP50 Index. Prospective investors should note that Millburn did not manage any account represented by the Barclay BTOP50 Index, and that this chart is presented for illustrative purposes only to show the performance of managed futures during periods of stress for equities, represented by the S&P 500 Index. Prospective investors should also note that the index performance is not the performance of the Fund. The index is not subject to certain investment restrictions, diversification requirements and other restrictions of the 1940 Act of the Code, which if they had been applicable, might have adversely affected its performance. Past performance does not guarantee future results.

Please see Important Risk Information on page 18.

# Seeking to Manage Drawdowns with Managed Futures

Period	Event	S&P 500 Index*	Managed Futures <sup>1</sup>	Difference
4Q 1987	Black Monday- Global Stock Markets Crash	-22.5%	16.9%	39.4%

The Fund's maximum sales charge for Class "A" shares is 5.75%. Investments in mutual funds involve risks. Performance is historic and does not guarantee future results. Investment return and principal value will fluctuate with changing market conditions so that when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month end performance information or the funds prospectus please call the fund, toll free at 1-866-447-4228. You can also obtain a prospectus at [www.CatalystMF.com](http://www.CatalystMF.com). Gross expenses as of the prospectus date excluding acquired fund fees and expenses are 2.28%, 3.03% and 2.03% for Class A, C and I shares.

Performance shown before December 28, 2015 is for the Fund's Predecessor Fund (Millburn Hedge Fund, L.P.). The prior performance is net of management fees and other expenses including the effect of the performance fee. The Predecessor Fund had an investment objective and strategies that were, in all material respects, the same as those of the Fund, and was managed in a manner that, in all material respects, complied with the investment guidelines and restrictions of the Fund. From its inception through December 28 2015, the Predecessor Fund was not subject to certain investment restrictions, diversification requirements and other restrictions of the 1940 Act of the Code, which if they had been applicable, might have adversely affected its performance. In addition, the Predecessor Fund was not subject to sales loads that would have adversely affected performance. Performance of the Predecessor Fund is not an indicator of future results.

Denotes Structural Bear Market

Performance shown before December 28, 2015 is for the Fund's Predecessor Fund (Millburn Hedge Fund, L.P.). The prior performance is net of management fees and other expenses including the effect of the performance fee. The Predecessor Fund had an investment objective and strategies that were, in all material respects, the same as those of the Fund, and was managed in a manner that, in all material respects, complied with the investment guidelines and restrictions of the Fund. From its inception through December 28, 2015, the Predecessor Fund was not subject to certain investment restrictions, diversification requirements and other restrictions of the 1940 Act of the Code, which if they had been applicable, might have adversely affected its performance. In addition, the Predecessor Fund was not subject to sales loads that would have adversely affected performance. Performance of the Predecessor Fund is not an indicator of future results. The Advisor has contractually agreed to waive fees and/or reimburse expenses of the Fund to the extent necessary to limit total annual fund operating expenses (excluding brokerage costs; underlying fund expenses; borrowing costs, such as (a), interest and (b) dividends on securities sold short; taxes and, extraordinary expenses) at 2.28%, 3.03% and 2.03% for Class A shares, Class C shares and Class I shares, respectively.

Millburn International (Europe) LLP is authorized and regulated by the Financial Conduct Authority (the "FCA").<sup>‡</sup>
- Real-world experience investing through multiple market cycles, including periods of severe market stress.

# Summary & How To Invest

---

At Catalyst Funds, we believe that traditional buy-and-hold equity and income strategies do not adequately address investor concerns in the current market environment. Our solutions are designed around characteristics that we believe investors need to pursue in their portfolios, such as seeking alpha-focused income-oriented and equity-oriented returns with lower correlation to the common indexes.

The [Catalyst/Millburn Hedge Strategy Fund](#) seeks to achieve long-term capital appreciation.

## How to Invest

Share Class	Ticker	Minimum Investment	CUSIP	Gross Expense*
Institutional	MBXIX	\$2,500	62827P816	2.03%
Class A	MBXAX	\$2,500	62827P832	2.28%
Class C	MBXCX	\$2,500	62827P824	3.03%

# Glossary

---

**MSCI World Index** is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. As of January 2017 the MSCI World Index consisted of 23 developed market country indices. Source: eVestment. **Global Bonds** refers to Citi World Government Bond Index, a capitalization weighted, unmanaged benchmark index consisting of the government bond markets of developed countries. Country eligibility is determined based on market capitalization and investability criteria. All issues have a remaining maturity of at least one year. The Index is rebalanced monthly. Source: eVestment. **Managed Futures Index** refers to the Barclay BTOP50 Index, an investable index that seeks to replicate the overall composition of the managed futures industry. The largest investable trading advisor programs, as measured by assets under management, are selected for inclusion in the BTOP50. In each calendar year the selected trading advisor programs represent, in aggregate, no less than 50% of the investable assets of the Barclay CTA Universe. For 2017 there are 20 funds in the Barclay BTOP50 Index. Source: eVestment. **S&P 500 Index** is an unmanaged index of 500 large capitalization companies in major industries. This total return index includes net dividends and is calculated by adding an indexed dividend return to the index price change for a given time period. Fees and/or transaction costs are not reflected. Source: eVestment. **US Bonds** refers to the Barclays Long Term Treasury Index, an unmanaged benchmark index of all publicly issued debt of agencies of the U.S. government, quasi-federal corporations and corporate debt guaranteed by the U.S. government, with maturities ranging from 10 to 30 years. Source: eVestment. **Hedge Funds** refers to the HEDGNAV Index - The Credit Suisse Hedge Fund Index was the industry's first, and remains the leading, asset-weighted hedge fund index. The index uses a rules-based construction methodology, identifies its constituent funds, and minimizes subjectivity in the index member selection process as a result of the rules-based method. It aims to achieve maximum representation of the index universe. Source: eVestment. **Sharpe ratio** is a measure of risk-adjusted return, calculated by taking the Compound Annual Rate of Return, subtracting the noted risk-free rate, and dividing this result by the Annual St dev. **Sortino ratio** equals compound annualized rate of return minus the Minimum Acceptable Return ("MAR") noted (0%) divided by annualized monthly standard deviation of returns below the MAR. **Calmar ratio** is a measure of risk-adjusted return, calculated by taking the Compound Annual Rate of Return and dividing this result by the absolute value of the largest drawdown. **Correlation** is the tendency for the returns of two assets, such as a portfolio and an index, to move together relative to their average. The measurement of this statistic (the correlation coefficient) can range from -1 (perfect negative correlation, one goes up, the other down) to +1 (perfect positive correlation. **Long-Short Equity Strategy** is an investment strategy that involves taking long positions in stocks that are expected to increase in value and short positions in stocks that are expected to decrease in value.

# Important Risk Information

---

Investors should carefully consider the investments, risks, charges and expenses of the Catalyst Funds. This and other important information about the Fund is contained in the prospectus, which can be obtained by calling 866-447-4228 or at [www.catalystmutualfunds.com](http://www.catalystmutualfunds.com). The prospectus should be read carefully before investing. The Catalyst Funds are distributed by Northern Lights Distributors, LLC, member FINRA. Catalyst Capital Advisors LLC is not affiliated with Northern Lights Distributors, LLC.

Investing in the Fund carries certain risks. The Fund will invest a percentage of its assets in derivatives, such as futures and options contracts. The use of such derivatives and the resulting high portfolio turn-over may expose the Fund to additional risks that it would not be subject to if it invested directly in the securities and commodities underlying those derivatives. The Fund may experience losses that exceed those experienced by funds that do not use futures contracts, options and hedging strategies. Investing in commodities markets may subject the Fund to greater volatility than investments in traditional securities. Currency trading risks include market risk, credit risk and country risk. Foreign investing involves risks not typically associated with U.S. investments. Changes in interest rates and the liquidity of certain investments could affect the Fund's overall performance. The Fund is non-diversified and as a result, changes in the value of a single security may have significant effect on the Fund's value. Other risks include U.S. Government securities risks and investments in fixed income securities. Typically, a rise in interest rates causes a decline in the value of fixed income securities or derivatives owned by the Fund. Furthermore, the use of leveraging can magnify the potential for gain or loss and amplify the effects of market volatility on the Fund's share price. The Fund is subject to regulatory change and tax risks; changes to current rules could increase costs associated with an investment in the Fund. These factors may affect the value of your investment.

Performance shown before December 28, 2015 is for the Fund's Predecessor Fund (Millburn Hedge Fund, L.P.). The prior performance is net of management fees and other expenses including the effect of the performance fee. The Predecessor Fund had an investment objective and strategies that were, in all material respects, the same as those of the Fund, and was managed in a manner that, in all material respects, complied with the investment guidelines and restrictions of the Fund. From its inception through December 28, 2015, the Predecessor Fund was not subject to certain investment restrictions, diversification requirements and other restrictions of the 1940 Act of the Code, which if they had been applicable, might have adversely affected its performance. In addition, the Predecessor Fund was not subject to sales loads that would have adversely affected performance. Performance of the Predecessor Fund is not an indicator of future results.

There is no assurance that the Fund will achieve its investment objective. You cannot invest directly in an index and unmanaged index returns do not reflect any fees, expenses or sales charges

# Morningstar Disclosure

---

MBXIX also rated 3-stars by Morningstar for the period ending 3/31/2025, based on 3-year risk-adjusted returns, out of 47 funds in the Macro Trading category. The overall Morningstar rating for the Fund is 4-stars out of 47 funds in the Macro Trading category. © 2025 Morningstar. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results.

The Morningstar Rating™ for funds, or “star rating”, is calculated for managed products (including mutual funds, variable annuity and variable life sub-accounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchangetraded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year (if applicable) Morningstar Rating metrics.
