

Catalyst Enhanced Income Strategy Fund

CLASS A:EIXAX CLASS C: EIXCX CLASS I: EIXIX

**SUMMARY PROSPECTUS
NOVEMBER 1, 2020**

Before you invest, you may want to review the Fund's complete prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund at <https://catalystmf.com/literature-and-forms/>. You can also get this information at no cost by calling 1-866-447-4228, emailing info@catalystmf.com or by asking any financial intermediary that offers shares of the Fund. The Fund's prospectus and statement of additional information, both dated November 1, 2020 are incorporated by reference into this summary prospectus and may be obtained, free of charge, at the website or phone number noted above.

Beginning January 1, 2021, the Fund intends to meet its shareholder report delivery obligations by posting annual and semi-annual shareholder reports to the Fund's website, www.CatalystMF.com rather than delivering paper copies. You will be notified by mail each time a report is posted and provided with the website link to access the report. You may elect to receive paper copies of a specific shareholder report or all future shareholder reports free of charge by contacting your financial intermediary (such as a broker-dealer or bank) or, if you are a direct investor, by calling the Fund at 1-866-447-4228. Your election to receive reports in paper will apply to all funds held within the fund complex.

You may elect to receive shareholder reports and other communications from the Fund or your financial intermediary electronically by contacting your financial intermediary or, if you are a direct shareholder, by calling the Fund at 1-866-447-4228. If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to do anything.

FUND SUMMARY: CATALYST ENHANCED INCOME STRATEGY FUND

Investment Objective: The Fund’s objective is current income.

Fees and Expenses of the Fund: This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge discounts on purchases of Class A shares if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund. More information about these and other discounts is available from your financial professional and is included in the section of the Fund’s prospectus entitled **How to Buy Shares** on page 113 and **Appendix A – Intermediary-Specific Sales Charge Reductions and Waivers**, and in the sections of the Fund’s Statement of Additional Information entitled **Reduction of Up-Front Sales Charge on Class A Shares** on page 64 and **Waiver of Up-Front Sales Charge on Class A Shares** on page 65.

Shareholder Fees (fees paid directly from your investment)	Class A	Class C	Class I
Maximum Sales Charge (Load) Imposed on Purchases (as a % of offering price)	4.75%	None	None
Maximum Deferred Sales Charge (Load) (as a % of the original purchase price)	1.00%	None	None
Maximum Sales Charge (Load) Imposed on Reinvested Dividends and other Distributions	None	None	None
Redemption Fee	None	None	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)			
Management Fees	1.50%	1.50%	1.50%
Distribution and Service (12b-1) Fees	0.25%	1.00%	0.00%
Other Expenses	0.36%	0.36%	0.36%
Total Annual Fund Operating Expenses	2.11%	2.86%	1.86%
Fee Waiver and/or Expense Reimbursement¹	(0.36)%	(0.36)%	(0.36)%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement¹	1.75%	2.50%	1.50%

¹ The Advisor has contractually agreed to waive fees and/or reimburse expenses of the Fund to the extent necessary to limit operating expenses (excluding brokerage costs; borrowing costs such as (a) interest and (b) dividends on securities sold short; taxes; underlying fund expenses; and extraordinary expenses, such as regulatory inquiry and litigation expenses) at 1.75%, 2.50% and 1.50% for Class A shares, Class C shares and Class I shares, respectively, through October 31, 2021. This agreement may only be terminated by the Fund’s Board of Trustees on 60 days’ written notice to the Advisor and upon the termination of the Management Agreement between the Trust and the Advisor. Fee waivers and expense reimbursements are subject to possible recoupment by the Advisor from the Fund in future years on a rolling three-year basis (within the three years after the fees have been waived or reimbursed) so long as such recoupment does not cause the Fund’s expense ratio (after the repayment is taken into account) to exceed the lesser of: (i) the Fund’s expense limitation at the time such expenses were waived and (ii) the Fund’s current expense limitation at the time of recoupment.

Example: This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, and then hold or redeem all of your shares at the end of those periods. The Example only accounts for the Fund’s expense limitation in place through its expiration period, October 31, 2021, and then depicts the Fund’s total annual expenses thereafter. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>YEAR</u>	<u>Class A</u>	<u>Class C</u>	<u>Class I</u>
1	\$644	\$253	\$153
3	\$1,071	\$852	\$550
5	\$1,524	\$1,477	\$972
10	\$2,773	\$3,160	\$2,150

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. The portfolio turnover rate of the Fund for the fiscal period ended June 30, 2020 was 94% of the average value of its portfolio.

Principal Investment Strategies:

The Fund seeks to achieve its investment objective by primarily investing in agency and non-agency commercial and residential mortgage backed securities (“MBS”) and other fixed income asset-backed securities, including securities backed by aircraft, automobiles, credit card receivables, and student loans.

The Fund does not limit its investments to a particular credit quality and may invest in distressed asset backed securities and other below investment grade securities (commonly referred to as "junk") without limitation. Below investment grade securities are those rated below Baa3 by Moody's Investor Services or equivalently by another nationally recognized statistical rating organization as well as non-rated securities. The MBS in which the Fund invests are generally liquid, in other words, can be sold at approximately the current market value within 7 calendar days. The Fund may hold up to 15% of its net assets in illiquid securities. In managing the Fund’s investments, the Fund’s sub-advisor, Wynkoop, LLC (the “Sub-Advisor”), seeks to construct an investment portfolio with a weighted average maturity that ranges between 1 and 10 years and a weighted average effective duration that ranges between -9 and 9 years. Duration is a measure of the expected life of a fixed income instrument that is used to determine the sensitivity of a security’s price to changes in interest rates. Effective duration is a measure of the Fund’s portfolio duration adjusted for the anticipated effect of interest rate changes on bond and mortgage pre-payment rates. Unique to the residential MBS market are securities, such as interest-only securities, and related derivatives, that have “negative duration.” This means that the value of these instruments normally increase with higher interest rates, the opposite of most other debt instruments. This generally allows some portion of the portfolio’s market risk to be hedged with a purchase, rather than a short sale, and allows the portfolio to realize positive cash flows on the hedge as a result of interest received with respect to that security.

The Sub-Advisor determines the allocation of the Fund’s investments across the various fixed income asset classes based on market supply and which asset classes it views as offering the best risk-adjusted values in the marketplace at a given time. However, the Fund expects to focus its investments in agency and non-agency commercial and residential MBS and, under normal circumstances, will invest over 25% of its assets in agency and non-agency commercial and residential MBS. In selecting individual securities for investment by the Fund, the Sub-Advisor selects securities that it believes offer the best risk/return opportunity based on its analyses of a variety of factors including collateral quality, duration, structure, excess interest, credit support, potential for greater upside and less downside, capture, liquidity, and market

conditions and favors undervalued investments that produce consistent returns in most interest rate environments. The Sub-Advisor attempts to diversify geographically and among the servicing institutions that service or originate the MBS.

The Fund is classified as “non-diversified” for purposes of the Investment Company Act of 1940 (the “1940 Act”), which means a relatively high percentage of the Fund’s assets may be invested in the securities of a limited number of companies that could be in the same or related economic sectors.

The Fund’s distribution policy is to make twelve monthly distributions to shareholders. The level of monthly distributions (including any return of capital) is not fixed and is not designed to generate, and is not expected to result in, distributions that equal a fixed percentage of the Fund’s current net asset value per share. Shareholders receiving periodic payments from the Fund may be under the impression that they are receiving net profits. However, all or a portion of a distribution may consist of a return of capital. Shareholders should not assume that the source of a distribution from the Fund is net profit.

Principal Risks of Investing in the Fund:

As with any mutual fund, there is no guarantee that the Fund will achieve its objective. Investment markets are unpredictable and there will be certain market conditions where the Fund will not meet its investment objective and will lose money. The Fund’s net asset value and returns will vary and you could lose money on your investment in the Fund and those losses could be significant.

The following summarizes the principal risks of investing in the Fund. These risks could adversely affect the net asset value, total return and the value of the Fund and your investment

Liquidity Risk. Liquidity risk exists when particular commercial and residential MBS would be difficult to purchase or sell, possibly preventing the Fund from selling such illiquid securities at an advantageous time or price, or possibly requiring the Fund to dispose of other investments at unfavorable times or prices in order to satisfy its obligations.

Asset-Backed and MBS Risk. When the Fund invests in asset-backed securities and mortgage-backed securities, the Fund is subject to the risk that, if the underlying borrowers fail to pay interest or repay principal, or otherwise defaults, the assets backing these securities may not be sufficient to support payments on the securities. Borrower default rates may be higher than expected.

MBS issued or guaranteed by private issuers are also known as “non-agency MBS.” Non-agency MBS generally are a greater credit risk than MBS issued by the U.S. government, and the market for non-agency MBS is smaller and less liquid than the market for government-issued MBS.

Concentration Risk. The Fund may focus its investments to a particular type of securities. Economic, legislative or regulatory developments may occur that significantly affect those securities. This may cause the Fund’s net asset value to fluctuate more than that of a fund that does not focus in that particular type of securities.

Credit Risk. Credit risk is the risk that an issuer of a security will fail to pay principal and interest in a timely manner, reducing the Fund's total return. The Fund may invest in high-yield, high-risk securities, commonly called "junk bonds," that are not investment grade and are generally considered speculative because they present a greater risk of loss, including default, than higher quality debt securities. Credit risk may be substantial for the Fund.

Distribution Policy Risk. The Fund's distribution policy is not designed to generate, and is not expected to result in, distributions that equal a fixed percentage of the Fund's current net asset value per share. Shareholders receiving periodic payments from the Fund may be under the impression that they are receiving net profits. However, all or a portion of a distribution may consist of a return of capital (i.e., from your original investment). Shareholders should not assume that the source of a distribution from the Fund is net profit. Shareholders should note that return of capital will reduce the tax basis of their shares and potentially increase the taxable gain, if any, upon disposition of their shares.

Fixed Income Securities Risk. When the Fund invests in fixed income securities, the value of your investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities owned by the Fund. In general, the market price of fixed income securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities. Other risk factors include credit risk (the debtor may default) and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments). These risks could affect the value of a particular investment by the Fund, possibly causing the Fund's share price and total return to be reduced and fluctuate more than other types of investments.

Industry Concentration Risk. A fund that concentrates its investments in an industry or group of industries is more vulnerable to adverse market, economic, regulatory, political or other developments affecting such industry or group of industries than a fund that invests its assets more broadly.

Interest Rate Risk. Interest rate risk is the risk that bond prices overall, including the prices of securities held by the Fund, will decline over short or even long periods of time due to rising interest rates. Bonds with longer maturities tend to be more sensitive to interest rates than bonds with shorter maturities. For example, if interest rates go up by 1.0%, the price of a 4% coupon bond will decrease by approximately 1.0% for a bond with 1 year to maturity and approximately 4.4% for a bond with 5 years to maturity. The maturity and effective duration of the Fund's investment portfolio may vary materially from its target, from time to time, and there is no assurance that the maturity or effective duration of the Fund's investment portfolio will not exceed its target. When interest rates are at historic lows, a heightened risk to the Fund is posed by the greater potential for rising interest rates to the extent the Fund's portfolio includes longer-term fixed income securities.

Junk Bond Risk. Lower-quality bonds, known as "high yield" or "junk" bonds, present greater risk than bonds of higher quality, including an increased risk of default. An

economic downturn or period of rising interest rates could adversely affect the market for these bonds and reduce the Fund's ability to sell its bonds. The lack of a liquid market for these bonds could decrease the Fund's share price.

LIBOR Risk. The Fund has exposure to LIBOR-linked investments and anticipates that LIBOR will be phased out by the end of 2021. While some instruments may contemplate a scenario where LIBOR is no longer available by providing for an alternative rate setting methodology, not all instruments may have such provisions and there is significant uncertainty regarding the effectiveness of any such alternative methodologies and potential for short-term and long-term market instability. Because of the uncertainty regarding the nature of any replacement rate, the Fund cannot reasonably estimate the impact of the anticipated transition away from LIBOR at this time. If the LIBOR replacement rate is lower than market expectations, there could be an adverse impact on the value of preferred and debt securities with floating or fixed-to-floating rate coupons.

Management Risk. The portfolio managers' judgments about the attractiveness, value and potential appreciation of particular stocks or other securities in which the Fund invests may prove to be incorrect and there is no guarantee that the portfolio manager's judgment will produce the desired results.

Market Risk. Overall market risks may also affect the value of the Fund. Factors such as domestic economic growth and market conditions, interest rate levels and political events affect the securities markets.

Mortgage-Backed Securities Risk. Mortgage-backed securities represent participating interests in pools of residential mortgage loans, some of which are guaranteed by the U.S. government, its agencies or instrumentalities. However, the guarantee of these types of securities relates to the principal and interest payments and not the market value of such securities. In addition, the guarantee only relates to the mortgage-backed securities held by the Fund and not the purchase of shares of the Fund.

Mortgage-backed securities do not have a fixed maturity and their expected maturities may vary when interest rates rise or fall. An increased rate of prepayments on the Fund's mortgage-backed securities will result in an unforeseen loss of interest income to the Fund as the Fund may be required to reinvest assets at a lower interest rate. A decreased rate of prepayments lengthens the expected maturity of a mortgage-backed security. The prices of mortgage-backed securities may decrease more than prices of other fixed-income securities when interest rates rise. The liquidity of mortgage-backed securities may change over time. Subprime mortgages are riskier and potentially less liquid than mortgage-backed securities.

Non-diversification Risk. Because a relatively high percentage of a non-diversified Fund's assets may be invested in the securities of a limited number of companies that could be in the same or related economic sectors, the Fund's portfolio may be more susceptible to any single economic, technological or regulatory occurrence than the portfolio of a diversified fund.

Prepayment and Extension Risk. Prepayment risk is the risk that principal on a debt obligation may be repaid earlier than anticipated. Extension risk is the risk that an issuer will exercise its right to repay principal on a fixed rate obligation held by the Fund later than expected. Both prepayment and extension risks may impact the Fund's profits and/or require it to pay higher yields than were expected.

Real Estate Risk. The Fund is subject to the risks of the real estate market as a whole, such as taxation, regulations and economic and political factors that negatively impact the real estate market and the direct ownership of real estate. These may include decreases in real estate values, overbuilding, rising operating costs, interest rates and property taxes. In addition, some real estate related investments are not fully diversified and are subject to the risks associated with financing a limited number of projects.

Security Risk. The value of the Fund may decrease in response to the activities and financial prospects of an individual security in the Fund's portfolio.

Sub-Prime Mortgage Risk. Lower-quality notes, such as those considered "sub-prime" are more likely to default than those considered "prime" by a rating evaluation agency or service provider. An economic downturn or period of rising interest rates could adversely affect the market for sub-prime notes and reduce the Fund's ability to sell these securities. The lack of a liquid market for these securities could decrease the Fund's share price. Additionally, borrowers may seek bankruptcy protection which would delay resolution of security holder claims and may eliminate or materially reduce liquidity.

Performance:

The bar chart and accompanying table shown below provide an indication of the risks of investing in the Fund. The bar chart shows the total return of its Class A shares for each full calendar year since inception. Class C shares and Class I shares would have similar annual returns to Class A shares because they are invested in the same portfolio of securities; however, the returns for Class C shares and Class I shares would be different from Class A shares because Class C shares and Class I shares have different expenses than Class A shares. The performance table shows average annual total returns for Class A, Class C and Class I shares and how their average annual returns compare over time with those of a broad-based market index. Sales charges are reflected in the information shown in the table, but the information shown in the bar chart does not reflect sales charges, and, if it did, returns would be lower. How the Fund has performed in the past (before and after taxes) is not necessarily an indication of how it will perform in the future.

The Fund's returns in the first quarter of 2019 may not be achievable going forward as the Fund's assets grow. The active trading strategy of the Fund had a significant impact on returns from launch date, especially when depicted as a percentage. The gains from individual trades had a magnified effect on NAV as a result of the small initial launch capital. As the assets grow, the denominator becomes larger and thus, individual trades do not necessarily have as much of an impact on returns. We continue to deploy our active trading approach, which seeks to take advantage of market inefficiencies and dislocations.

Updated performance information is available at no cost by calling 1-866-447-4228 and on the Fund's website at www.CatalystMF.com.

Annual Total Returns

During the period shown in the bar chart, the highest return for a quarter was 11.47% (quarter ended March 31, 2019), and the lowest return for a quarter was (1.53)% (quarter ended June 30, 2019). The Fund's Class A shares year-to-date return as of September 30, 2020 was 4.67%.

Average Annual Total Returns (for the periods ended December 31, 2019)

	1 Year	Since inception (12/31/18)
Class A		
Return Before Taxes	10.02%	10.02%
Return After Taxes on Distributions	8.34%	8.34%
Return After Taxes on Distributions and Sale of Fund Shares	5.91%	5.91%
Class C		
Return Before Taxes	15.81%	15.81%
Class I		
Return Before Taxes	17.00%	17.00%
Bloomberg Barclays U.S. Aggregate Bond TR Index (reflects no deduction for fees, expenses or taxes)	8.72%	8.72%
Bloomberg MBS Index(reflects no deduction for fees, expenses or taxes)	6.35%	6.35%

After-tax returns are calculated using the highest historical individual federal marginal income tax rate and do not reflect the impact of state and local taxes. Actual after-tax returns depend on a shareholder's tax situation and may differ from those shown. After-tax returns are not relevant for shareholders who hold Fund shares in tax-deferred accounts or to shares held by non-taxable

entities. After-tax returns are only shown for Class A shares. After-tax returns for other share classes will vary.

Advisor: Catalyst Capital Advisors LLC (the “Advisor”) is the Fund’s investment advisor.

Sub-Advisor: Wynkoop, LLC (the “Sub-Advisor”) is the Fund’s investment sub-advisor.

Portfolio Managers: Leland Abrams, Principal and Portfolio Manager of the Sub-Advisor, and Jui Chiew Tan, Portfolio Manager and Trading Analyst of the Sub-Advisor, serve as the Fund’s portfolio managers. Mr. Abrams is the Lead Portfolio Manager of the Fund. Mr. Abrams has served the Fund as a portfolio manager since 2018 and Mr. Tan has served the Fund as a portfolio manager since November 2019.

Purchase and Sale of Fund Shares: The minimum initial investment in all share classes of the Fund is \$2,500 for regular and IRA accounts, and \$100 for an automatic investment plan account. The minimum subsequent investment in all share classes of the Fund is \$50. You may purchase and redeem shares of the Fund on any day that the New York Stock Exchange is open. Redemption requests may be made in writing, by telephone or through a financial intermediary to the Fund or the Transfer Agent and will be paid by check or wire transfer.

Tax Information: Dividends and capital gain distributions you receive from the Fund, whether you reinvest your distributions in additional Fund shares or receive them in cash, are taxable to you at either ordinary income or capital gains tax rates unless you are investing through a tax-deferred plan such as an IRA or 401(k) plan. If you are investing in a tax-deferred plan, distributions may be taxable upon withdrawal from the plan.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
